## » DIA'S BEAUTY DIARY

- **THE MAKEUP OF STYLING:** A series of base and a reflection of who you are.
- **PERSONAL STYLE:** Easy, feminine and fuss-free. I can't be choosy. I am a messiness freak.
- **QUICK TIP TO GO GLAM:** A great blow-dry, winged liner, strong lips and shiny cheeks, a simple dress that fits well and a pair of shoes.
- **BEAUTY HAVERS:** Mascara and a stain on my cheeks and lips. I use an alcohol-free, natural makeup remover and never use soap.
- **STYLING SECRETS:** A combination of functional styling and PINKIE, 5 to 6 times a week.
- **SKIN SECRETS:** It's genetics—my mother's amazing Bengali genes.
- **HOMEWAGE REMEDIES:** When I've spent time out in the sun, I resort to fruit aloe vera gel before I sleep. Besides that, it's the standard cream—moist and rich.

### Ishrat Sahgal

WOMEN, DESIGN & INTERIORS

When Ishrat Sahgal returned to India in 2013 after majoring in interior architecture from the Rhode Island School of Design, she noticed a gap in the carpet industry. Designs were the de rigueur neutral colours, too expensive or too similar, Kashmiri, traditional, and featuring wool or flat silk. A line arts enthusiast, and wanting to treat carpets as a canvas, Ishrat, 48, set up Mosaic Co in Delhi the same year. Today, the brand is known for its stunning, upcycled carpets crafted from leftover sari silk yarn, and also offers interior consultancy.

THE BESTSELLER: THE LUMINOUS KAT KHON CARPET.

**WHAT SETS MOSAIC CO CARPETS APART?** Our complementary design consultancy helps each space reach its fullest potential. Once you have a rug from Mosaic (a childhood nickname) on the floor, it acts as a focal point, and everything else can be subtle or eclectic, as per your aesthetic. Due to sari silk's nature, every carpet is unique.

**DO YOU FEEL THAT YOU HAVE FILLED A GAP IN THE INDUSTRY?** Yes, and that has been most exciting. For some,

the carpet industry hadn't any innovation and what we saw were the same old things. Our idea was to change the way people look at carpets.

**YOUR INSPIRATIONS?** I'm constantly inspired by the hues of earth and passion of a lot of artists and designers across disciplines—painters, sculptors, architects, among others. But I believe that original inspiration comes from the unexpected, and that one can find beauty in the most unsorted places.

**STYLE TO YOU...**...being comfortable in my own skin. It spans across mediums—your clothes, your home and your conversations. A truly stylish person is holistic in this way.

**ADVICE TO ASPIRING STYLEMAKERS?** Question the normal and find your way of doing things differently. People don't or assume and then reflects whatever you have created. Also, dream big.

**ADVICE TO UPCOMING BLOGGERS?** Start out as a journalist, a writer, a designer or a cook and then blog about it. Have a strong hold on your subject. Starting a blog because everyone's doing it will lead you to being irrelevant. And don't expect instant results.

**FAVOURITE DESIGNER: ITALIAN ARCHITECT CARLO SCARPA.**

"In some ways, the brand is an extension of my personality. The voice it takes on is like an organic conversation that I would have with someone."

As told to Meghna Menon

### Rukmini Ray

WOMEN, DESIGN & INTERIORS

Most bloggers love colours—muted or vibrant—but Mumbai-based Rukmini Ray, 31, blissfully blogs at 'Transtrator about embracing the negative space (everything white), from her, not surprisingly, all-white home. Having started the blog in 2010 as a way to document changes she was bringing about in her tiny rental, the award-winning blogger now has an ardent following of people who admire her sense of style and courage to be unique. She is soon set to launch her line of fabric, tiles and wallpapers.

STYLE FILES: SIMPLE TEXTURES AND A TIGHT COLOUR PALETTE.

"I love designer Rachel Ashwell's style as I'm a fan of shabby chic. But my latest muse is artist Justina Blakeney, even though our styles differ."

**WHAT HAS THIS JOURNEY BEEN LIKE?** I've learnt an immense lot, the most crucial being this: Content is still the king. The second is being consistent. Once these two are sorted, be a marketer and market your blog holistically. There has to be design in all the three areas or you won't break the clutter. If you are into your blog, you will shine.

**YOUR INSPIRATIONS?** The most mundane are everything. I take a look at my home, nothing is designer or expensive or even very different for that matter. It's every day things treated differently—through colours, patterns and styling.

**DO YOU FEEL THAT YOU HAVE FILLED A GAP IN THE INDUSTRY?** I think so. As a blogger, I enjoy a very sweet spot. I know the designers and the audience just as well.

**ONE OF RUKMINI'S FAVOURITE READS ON INTERIORS.**

As told to Meghna Menon

### Strength training

Aerobics are great, but it's now more important than ever to add strength training to your regimen. Four hundred and fifty grams of muscle burns 36 calories a day. Women tend to lose 30 grams of muscle each year after age 30, which means by age they need 30 fewer calories daily to maintain weight.

To replace lost muscle and boost metabolism, women in their 40s should lift weights or do resistance training, such as exercises with an incompressible resistance band, for 30 minutes to an hour at least twice a week. It is hard work but it will serve you well in the future.

your 40s

Rapidly changing hormones and the stress of daily life cause a woman's metabolism to hit the brakes in her 40s. Add a natural loss of muscle mass, and fighting fat becomes a daily challenge.

Women often gain weight when they let an even while maintaining their diet and exercise routine. There is an on the board metabolic rate (how many calories the body burns to stay alive) which drops by 0.5 every year after age 40.

With biological and environmental factors working against them, it's no wonder that women gain an average of four and a half kilos per decade after age 40. And as metabolism slows, those extra kilos shift from the hips to the abdomen—the last place you want to gain extra weight. Now is the time you can take control to stay slim in the future.

### Stress & menopause

Most women begin the two to eight per cent of perimenopause in their 40s. Try a stress-reducing activity, such as yoga, to help with the symptoms. "And if you do get the associated mood swings, remind yourself that this is just a temporary phase—you are not losing your mind," says Ball.

### Muscle loss

When your body is naturally adding fat and losing muscle, it's critical to eat more lean protein, which helps burn fat. Unfortunately, most women eat too many carbs, starting at the first meal of the day. "Everyone eats protein for lunch and dinner, but breakfast is a big problem," Mervy says.

Women should get 30 grams of protein in every meal. In the morning, allow time for 100g of protein or an egg white omelette. Drinking a glass of protein-rich almond milk will help you reach your goal as well.

your 50s

Keeping weight in check can be difficult during menopause, which most women experience in their 50s. After menopause, women lose the monthly boost in testosterone that naturally occurs during ovulation. Plus, accelerated bone loss can make exercise more difficult.

Doctors sometimes recommend treatments such as oestrogen replacement to ease any severe symptoms, but often exercise is the best medicine. "Going through menopause is easier for people who have been exercising regularly," Robinson says. So don't stop being active.

Women who continue to struggle with weight may have hypothyroidism—a fairly common problem in women older than 50. Blood tests can diagnose an underactive thyroid, which is easily treated with synthetic hormones.

### Calcium

With bone loss reaching its peak in the five to seven years following menopause, it's imperative that you get enough calcium to keep your bones healthy and by getting 1,200 mg of calcium a day, which may require a supplement.

"I only eat treats during festivals, and it has really helped control my weight."

—Neha Singh, 55

BETTER HOMES AND GARDENS | MARCH 2012

home | family spaces

### Famous Mexican architect Luis Barragan loved colour

used a lot of colour in his projects and, for this house, a large amount of inspiration came from his work," says one half of the couple, Neha. "We love using colour fearlessly in our projects and when we get an opportunity to work on our home, we ended up using it to different shades of paint," she laughs. Well, this philosophy of treating design as a way of life certainly fits her home and work.

Partners, both in life and in Layers Studio for Design and Architecture, for more than eight years, Neha and Gaurav's inclination towards art and good design is what makes things exciting at home. Being nature lovers, who love their walks with children and the 'Labrador', and spending time gardening together, the architecture school overhauls always worked their home to be in a place, where they wouldn't worry about pollution and lack of space. But being architects, their work forced them to be city animals! This led them to Greater Noida, which they found to be a good balance and a well-planned city with credible infrastructure. Factors like orientation, natural light, ventilation, unobstructed views of areas around and pricing of the flat suited the deal. What also helped was that the house provided ample avenues to bring about small changes to make it look like what they does now.

An unconventional welcome

The living room exudes vibrant colours, air and plants, along with lots of colour. This has been inspired by their artwork created and collected over time.

home | family spaces

GET INSPIRED The couple created this vibrant light feature by using empty Mosaic coffee jars.

The bedrooms and bathroom, facing each other, are set in similar colours and with identical floor tiles to maintain uniformity. Neha adds that the bedrooms to consist of a TV on purpose to avoid bad sleeping habits.

### In a world of ideas

This emphasis on maximum utilisation of space is evident throughout the eclectic abode. "When we were working on our house, we were very particular about using every room, nook and corner efficiently, yet without any compromise on the aesthetics of that area. The house with its living-cum-dining hall and three bedrooms had to accommodate not just our home, but also our architecture studio, a client meeting area, an entertainment area, a guest room, etc. So, we created spaces, which are flexible in use, and rooms that can convert to a meeting room, a guest room or a play area, as and when required, through simple yet innovative ideas like foldable tables, a collapsible bed and windows within the house that help in connecting various areas," elaborates Neha, who loves picking up stuff from various places, be it from markets, home stores like the Good Earth, Palamda and Lifestyle, or online destinations like Pepperfry and Urban Ladder. Neha's favourite corner as it is usually connects with the whole house and is where the extended family come in and is entertained.

"Our extravagant splurges have been the good art pieces and yet the best bargain has been creating most of the art ourselves!"

—Gaurav Kapoor

tiles are reflective of the palaces of Rajasthan. The most special corner in this room, though, is occupied by its month-old Kalli and her mobile case and bamboo crib, set against another chandelier wall with inspirational quotes beautifully written on it. "We wanted to create something, which looks more contemporary and subtle, and is yet inspirational and interesting for Kalli. In fact, we resisted colour here as this area houses her stuff and you know how children's products are nothing but an overdose of colour," says Gaurav. Striking a balance with such abundance of colours, is the couple how they make it work successfully without the risk of it becoming "The risk of using so much colour together is that it can easily border into being kitschy. So, you must restrain yourself on other aspects of design. The ending too many shapes and styles and the theme must run throughout the house," the couple signs off.

# SCORECARD

## TENNIS' FUTURE ACES

Aspiring kids from 20 countries got a chance to tune their skills at the London event in Paris

BY DEEPTI PAT WARDHAN

■ **SENCE'S INAGURATION** In 1890, the Eiffel Tower has stood for a lot of things. It was originally built as a radio transmitter during World War I, and a flag post as France took back the tower from the German Revolution. An architectural and an engineering marvel,

the 324-meter wrought iron tower is the beacon of Paris, and a symbol of French pride. It was used as a radio transmitter during World War I, and a flag post as France took back the tower from the German Revolution. An architectural and an engineering marvel,

own's tennis champions. This year the highest-ranked players, girls and boys, from 20 countries—Australia, Austria, China, France, Germany, Hong Kong, India, Italy, Japan, Korea, Mexico, Poland, Russia, Singapore, Spain, Switzerland, Taiwan, Thailand, the United Kingdom and the United States—participated in the event that took place in June, on the same clay as the French Open's new battle.

Aditya Radhi and Anjali Radhi—who are not related—represented India at this gathering of tennis hopefuls. Both the players narrowly missed out on the quarterfinal berth—finishing third in their respective group of five.

A few weeks ago, 40 athletes signed for excellence at its feet.

The Longines Future Tennis Aces (LFTA) brought together two of Paris' most famous global icons—the Eiffel Tower and Roland Garros—during its sixth edition. Established in 2010, the LFTA is a quarterfinal competition between top-ranked players, all under-16, from various countries in what is called, a search for "tomor-

### IN AUGUST COMPANY

1. Vice President, Anand Gupta, Arantxa Sanchez Vicario, Andre Agassi and 2011 Grand Slam champion Juan Carlos Capelli (2). Vice President of Longines.

the two-day crash course in clay-court tennis may not be enough by itself, it's a good start for the youngsters, especially those from non-European countries, where clay is not the predominant surface of play for juniors. Red clay is regarded as the best surface to train on for kids since it's not only easier on the joints but also helps

embed strokes of precision and smart point-construction—the bedrocks of this generation of physical tennis.

"The girls champion, Victoria Jimenez, showed both those qualities en route to a 4-1, 4-1, 6-4 win over head-hitting American Clervie Ngumwa. Being left-handed and Spanish comes with certain expectations on Parisian

clay. And eight days before Rafael Nadal was his 18th title at Roland Garros, the 19-year-old Jimenez was her own piece of otherwise with a diligently constructed victory.

"I felt very happy because the Spanish girl played well and won today," said three-time French Open champion-turned-coach Arantxa Sanchez Vicario. "I know her very well and it's great that she won. To play here, in this unique place underneath the Eiffel Tower, it doesn't happen very often. Maybe once in a lifetime. It's very important to have some success or tournament like these and then play other junior tournaments before you turn a pro. One day, you try to play the big events, try to win Grand Slams and be the No. 1. It is a dream come true for a lot of kids. It's a long way, a long journey but that's how you start," she added.

To complete the symphony of the ruling class

1. **Shikhar Dhawan** became the first Indian to score a century before lunch on the first day of a Test match—doing so against Afghanistan in the historic one-off Test at M Chinnabhai Stadium in Bangalore.

3. **Carla Suarez-Villa** bagged a hat-trick in Portugal's World Cup opener against Spain. It was Portugal's first World Cup hat-trick. This was only the second time that David de Gea conceded three goals in a single match for Spain.

33. **M.S. Dhoni** overtook Pakistan's Karim Akmal's record of most stumpings in T20I matches. The Pakistanis hold the record with 32 stumpings in T20I matches, but the former India skipper overtook him and currently has 33.

# THE BITE OF THE UNDERDOGS

The FIFA World Cup in Russia rocked the hierarchy of world football. The elimination of defending champions Germany, top contenders Spain, Argentina and Portugal, made it anyone's cup for the taking. While France took home the Cup, the underdogs emerged and caught the fancy of football aficionados around the world.

## GEOFFREY'S OLYMPIC FLAME

Three-time TCS World 10K champion Geoffrey Kamworar wants to emulate Kenyan greats Paul Terer and Eliud Kipchoge at Tokyo 2020

BY RICHET BHARDWAJ

■ **NO PROBLEMS** for getting what the dominant forces in long-distance running are. It's a well-established fact that Kenya and Ethiopia share the honors in most international races. This year's TCS World 10K was no exception. Kenya's Geoffrey Kamworar stole the thunder from the Ethiopian duo of Beshen Legesse and Misheck Gemenyo to win his third title in Bangalore.

Kamworar, the winner of the last two world half marathons titles, completed the 10,000-meter race in 28 minutes 18 seconds, more than 30 seconds shy of his career record set up in the 2016 edition (27:44). He had also won the 2012 edition of the Bangalore race.

The two-time World Cross Country champion lost the race against him in the girls and reached the halfway point in 14:28, raising expectations of a new career record. But the heat and humid weather conditions derailed the Kenyan while he began charging towards the finish line, and lead them from a packed Kenyan stadium in the heart of the bustling IT capital.

"I think we were all cautious about the weather in the first half of the race. It was very hot, but I think that's what our team's career record, I came here thinking about the course record and tried the best I could. But I could feel the temperature rising as I was running up. I was

paying for just three minutes before starting to sweat. It would be great if the organizers could advance the race's start by 30 minutes," Kamworar told reporters after pocketing US\$ 20,000 for his effort.

Talking exclusively to Sports Illustrated India, Kamworar expressed his liking for Indian races and his aspiration to win an Olympic medal in the 2020 Tokyo Games.

Kamworar began running in his country through international competitions—as opposed to earning quick bucks for his physical abilities.

"I used to run in school. As students we had to run in the morning, in the afternoon and in the evening as well. I was always running. As a grown-up, I could see some athletes running, carrying the Kenyan flag and I really admired them. I wished that one day I could run my first marathon. I just started about running at the age of 18C. The 10K race is inspired by the likes of world champions Paul Terer and Eliud Kipchoge, also from Kenya, and wants to emulate them in the Olympic Games two years from now. "Actually what's missing from my cabinet is an Olympic medal

and I am going to work and train extra hard. Maybe in 2020 I will get one. I have not yet decided on the distance (10,000 meters or marathon). It depends on my form in the preceding races." That's what inspires me to come and run amongst them. I aspire to be one of the best. I later this year I have the city, to which I will be going to win the 2020 Tokyo Marathon runner-up (2016, 2017 and 2018).

The 2016 TCS World 10K was won by Kenyan runner-up (2016, 2017 and 2018).

In the women's category, breaking the 2014 career record owned by Lucy Kibet of Kenya (31:46). Agnes Tey rose again triumphed. Kenya's authority in the race by clinching the crown in 31:49.

Leading Results  
Men  
Geoffrey Kamworar (KEN) 28:18  
Beshen Legesse (ETH) 28:30  
Misheck Gemenyo (ETH) 28:39

## + HOMEING IN

### MANEJESSE

Mane, Bhaskar, 36, took home to multiple medals at the 2019 Junior World Cup in Germany. In the 12th air pistol, he defeated China's Kaiwan Lu to take gold. In the mixed 10m event, Bhaskar teamed up with Anjali Jain to clinch the silver. The Punjab girl ended the tournament with a bronze in the 10m air pistol team event.

### ANANDI LARDE

Anandi Larde, who has been on a comeback trail over the last couple of months, flourished when she won the 10m air pistol event at the 2019 Junior World Cup. She finished 12th at the Quiksilver Lotus National and joint fourth at the Travelers Championship in Connecticut. The 35-year-old, whose form had taken a dip, bagged US\$ 202,125 in prize money from these PGA Tour events.

## THEY SAID IT

Who said what in the world of sport to make us laugh and make us cry

"I'm not proud of my transfer fee, or the fact that I am the most expensive player ever. That's money and nothing else... Personally I would have paid less for myself."  
—Neymar, who is currently the most expensive footballer, spoke on the amount he was paid for transfer from Barcelona to Paris St. Germain last year.

"I sleep very well at night. I have a very easy conscience."  
—Queen Rania of Jordan and Mohamed Ali, the Egyptian forward who suffered a shoulder injury after a trade with him in the Champions League final.

"Facing Rashid Khan in the nets for the past two years as we play for the same T20 team, has helped me."  
—Shikhar Dhawan, after becoming the first Indian to score a century before lunch in the one-off Test against Afghanistan.

"I'm used to having Indians cheer for me, but it was really good to have an American crowd cheering for an international athlete, tagging my pictures on Instagram."  
—Tajon Elie, who is only the second Indian track and field athlete to receive a full scholarship at a U.S. college.

"Lots of captains have been wicketkeepers as well. You get a pretty good position to see what's happening and what's going on, so I don't think it's a problem."  
—Jim Butler, who was appointed England captain for the Australia series, after Zander Morgan opted out owing to injury.

### \* OUTSIDE EDGE by Satish Acharya

THESE DAYS, when the world's best shooters continued to dazzle with their good shows, as Eleriini Viikari shot at the 2019 Junior World Cup, she finished 12th at the Quiksilver Lotus National and joint fourth at the Travelers Championship in Connecticut. The 35-year-old, whose form had taken a dip, bagged US\$ 202,125 in prize money from these PGA Tour events.

## S O T Y

## Balbir Singh Sr.

LIVING LEGEND

A three-time Olympic champ to a patriot who auctioned off all his gold when the country needed it, Balbir Sr. is what a legend is made of.

**SPORT**  
**HOCKEY**  
**MAJOR ACHIEVEMENTS**  
OLYMPIC GOLD (1948, 1952, 1956)  
**CAREER HIGHLIGHTS**  
DEFENDING AN OLYMPIC GOLD THREE TIMES—AN UNPRECEDENTED FEAT  
SCORING FIVE GOALS IN THE 1952 GOLD MEDAL MATCH AGAINST THE NETHERLANDS  
**DEFINING MOMENT**  
SCORING THE OPENING GOAL FOR INDIA AGAINST SWITZERLAND IN THE 1948 OLYMPICS

over to the Indian side, their property forfeited. But it was the least of his losses. Friendships cultivated over decades were snuffed by a time drawn on a paper map. The unprecedented valour would shock Balbir, not least because as an officer in the Punjab Police he would visit the scenes of some of the worst atrocities. Hockey was far from the country's consciousness by the time 1948 arrived. And yet, an Olympic medal had to be won. In the first set of 29, Balbir's name was omitted. No reason was given. The newspapers picked it up, and after a quick evaluation, the selection committee offered the

# GREEN LIGHT

Here's how four balcony-solution providers breathed new life into mundane outdoor spaces by turning them into green havens. Take notes.

## STUDIO EARTHBOX

Co-founded by mother-daughter duo Sangeta and Priyam Datta in 2015, the Gurgaon-based Studio Earthbox was born out of their shared love for decorating. Sangeta has been a seasoned scenographer, and Priyam is experienced in the lifestyle and decor industry—together, they constructed beautiful outdoor spaces. “The idea was to transform a balcony space from a conventional ‘view of green’ to something more appealing and functional,” shares Priyam. The brand also retails handcrafted garden décor accessories, such as planters, shelves, birdhouses, etc. through [studioearthbox.com](http://studioearthbox.com).

BEFORE

### WORKOVER

**BEFORE BORING BASICS** This sat conventionally, accompanied by an ordinary, dull sitting arrangement.

### CREATIVE MOVES

**STEP 1** To create the feel of a garden, the floor area was covered with faux grass and some white pebbles.

**STEP 2** A wall-sized vertical wooden planter box with a tall screen (crafted using pinewood) was installed to hide the split AC unit.

**STEP 3** Next, the Alpha Ladder Shelf (from their own range) was added, with small, colourful ceramic pots and garden accessories adding its shikhs. This setting helps keep the floor space clear and makes it easy to maintain the area.

## URBAN GREENERY

As someone who grew up amidst the lush green surroundings of fishless, 45-year-old Shradha Bhargava was disappointed by her lack of connect with nature when she moved to Mumbai in 2013. Aiming to re-establish that connection, she began creating green roofs in her own balconies. Motivated by the appreciation she received, she started Urban Greenery, an innovative balcony decoration service that provides cost-effective balcony makeover. “There’s nothing worse than a bare balcony,” she says.

SOME PRETTY PLANTS, RUGS AND OLD LAMPS ARE ALL YOU NEED AND YOU'RE GOOD TO GO

# ORCHID love

For years, orchids have had a reputation for being expensive, high-maintenance divas. Now that they're so much easier to find (and afford) at florists and nurseries, we share stylish new ways to showcase these exotic beauties.

No soil needed: In the wild, orchids pull nutrients from the air and rain. Inside, they prefer fast-draining bark or sphagnum moss.

## DISH GARDEN

High orchids (Gynerium), driftwood and rocks create a display that's both elegant and rugged. Remove orchids from the nursery pot, cover the roots with moss and secure with florist wire (if needed). Use branch corners and rocks to support the orchids. Pour a cup of water over root balls once a week. *Source: Charming Beards, Japan.com*

## PLANET ORCHID

A trio of hanging spheres filled with pink moth orchids and aspidistra creates an extraordinary garden. Tuck the nursery pots in peat moss, then pour it with a inch-thick layer of peat moss for the aspidistra. *Source: Charming Beards, Japan.com*

TO AVOID SOGGY ROOTS: PLACE ORCHIDS IN THE SINK, RUN WATER OVER THE ROOTS (AND GROWING MEDIUM), AND LET DRAIN.

Too much light burns leaves. Too little results in fewer flowers.

Peat Moss helps improve drainage.

## ORCHID BASICS

A wide variety of orchids is readily available at nurseries. And, once you get them home, do not forget to keep them in mind. **LIGHT** Orchids prefer bright, indirect light. Keep away from daily windows. **WATER** Over watering is the most common mistake in orchid care. Water every 7 to 10 days when roots just start to dry (see tip above). **FERTILIZE** Feed once a month with an orchid fertilizer.

# SPACE SAVERS

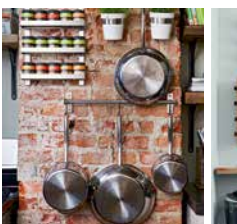

Are you forever struggling to create extra space in your house? Try these handy tricks to carve out some additional storage.

## BOX IT UP

Place a set of four metal storage boxes under your bed. Since these boxes have ample space, they are extremely handy and can hold all types of toys, books, snacks, clothes and many other knick-knacks. Available in various materials, such as plastic, metal and cardboard, they are very cost-effective.

**ABCD SYNDROME** Lili-based professional organizer Lorie Marmore's ABCD method is perfect for sorting cluttered space. A: Items used daily; B: Items used weekly or monthly; C: Items used occasionally or rarely; and D: Items seldom or never used. Identify storage locations for each. A: Items used daily; B: Items used weekly or monthly; C: Items used occasionally or rarely; and D: Items seldom or never used. Identify storage locations for each. A: Items used daily; B: Items used weekly or monthly; C: Items used occasionally or rarely; and D: Items seldom or never used. Identify storage locations for each.

OPEN-BRICK WALLS ADD A STATEMENT ELEMENT IN A KITCHEN AREA THAT IS CLUTTERED WITH LOTS OF COLOURS AND TEXTURES.

## TAKE A SEAT

To maximize the seating capacity of a small dining table, create a wall-to-wall hutch with hidden storage in a corner. The storage cubbies are perfect for storing kitchen appliances and high-chairs.

## HANG IN THERE

A narrow kitchen wall with horizontal bars and hooks becomes a handy utility area where you can hang pots, pans and spices.

## FLOATING FORM

If you don't have enough space to store your wine, select an unusual wall and attach a floating wine rack to it. Below this, you can add a small buffet (using a wooden plank instead of a cumbersome design) to store all the beverage requirements of your home—coffee maker, glasses, mugs, artisanal, etc.

# how to speak Italian

Even the most well-travelled are sometimes lost with pronunciations. Our Italian speak-easy helps you talk like a pro in no time.

BY STACEY MOORE PHOTOGRAPHS: KEATON MOYAT

One of the fastest ways to learn Italian food terms (without travelling to Italy) is to visit restaurants that serve up authentic Italian cuisine. Don't shy away from ordering an entrée, such as Penne all'Arrabbiata, just because you haven't learned how to roll your r's. Use this list as a guide for learning how to pronounce some of the common terms found on Italian menus. Consider that some Italian words give clues to their English counterparts, as with fritto and fried, stoccafisso and stockfish, and so on. For other words, you'll have to rely on sheer memorisation or word-association games. For instance, take pomodoro sauce that's made with tomatoes. It sounds a little like the pom-pom, they, pom-pom are round, like tomatoes—get the picture.

|                                                                                                                                                                                                    |                                                                                                                                                                           |                                                           |                                                                                                                                          |

smooth OPERATOR

Did you know that a single glass of smoothie can work wonders for your skin and hair? Three experts share their go-to recipes.

BLUEBERRY BANANA

By Dr. Chiranjy Chhabra, dermatologist

"This smoothie is high in iron and helps cure haemoglobin deficiency. Haemoglobin carries oxygen for the growth and repair of the cells in the body and stimulates hair growth, too."

- 1 cup frozen blueberries
- 1 banana
- 1 cup spinach
- 1 cup almond milk

Blend all for a wholesome, healthy breakfast.

GREEN SMOOTHIE

By Dr. Chiranjy Chhabra, dermatologist

"This smoothie is high in iron and helps cure haemoglobin deficiency. Haemoglobin carries oxygen for the growth and repair of the cells in the body and stimulates hair growth, too."

- 1 cup frozen blueberries
- 1 banana
- 1 cup spinach
- 1 cup almond milk

Blend all for a wholesome, healthy breakfast.

AVOCADO HONEY

By Dr. Chiranjy Chhabra, dermatologist

"Avocado is excellent for dry skin and provides nourishment to both hair and skin. You can drink this in the morning, on an empty stomach."

- 1 cup frozen blueberries
- 1 cup spinach
- 1 cup almond milk
- 1 small dash of honey

Blend all for a wholesome, healthy breakfast.

ULTIMATE HEALTHY

By Dr. Chiranjy Chhabra, dermatologist

"This mix has natural sweetness. There's no added protein from yogurt and a good dose of vitamin C from pineapple."

- 1 cup frozen blueberries
- 1 cup spinach
- 1 cup almond milk
- 1 small dash of honey

Blend all for a wholesome, healthy breakfast.

shake it off

A pinch here, a dash there—know what salt really means for your health and learn to keep tabs on how much you're eating.

MEASURE IT

Mostly you should keep your daily sodium intake to around 1,500 mg (about 1/2 teaspoon). The American Heart Association says most healthy people can have 2,300 mg daily, but some—especially if you're older than 50—should stick to 1,500 mg. The main reason: Too much salt raises your risk for high blood pressure, which can increase your risk of stroke, heart disease and kidney problems.

SNEAKY SOURCES

Most of the sodium we get—about 75%—comes from restaurant meals and packaged foods. Big culprits include soup, frozen meals, salad dressing, cold cuts, bread, cereal and cottage cheese. Check labels to keep tabs, if you're eyeballing 5% of the daily value (DV) (see p. 2) or 10% (see p. 2) or less sodium per serving (100 mg) is low in salt, 20% DV or more sodium per serving (over 400 mg) is high.

THE TRUTH ABOUT SPECIALTY SALTS

All types of salt have the same amount of sodium, but bigger granules (like those of sea salt and kosher salt) mean you get more sodium in one granule, so you can use less when sprinkling it on top of foods. And you, specialty salts like Himalayan pink salts have minerals, but in such tiny amounts that you don't really get any health benefits.

WHAT THE LOW-SALT CLAIMS MEAN

Many packaged foods market lower salt versions. Here are the definitions of the terms according to the FDA: Reduced sodium: 25% or less sodium of sodium or less per serving. Low sodium: 140 mg of sodium or less per serving. Reduced sodium: At least 25% less sodium than the regular product. Light in sodium or lightly salted: At least 50% less than the regular product.

GOOD TO KNOW

THE SODIUM FACTOR

When buying table salt, get iodized. Your body needs iodine for thyroid health (the gland regulates metabolism, growth and body temperature). If you're pregnant, your baby's brain development.

DON'T FORGET THE SIDS

Pay attention to that salt intake as well. More than 90% of children ages 4 to 18 get too much sodium. The upper limit is 3,000 mg for them, too. ■

letters from an artist

Hand lettering is the rage right now—the decorative drawing of letters 'is being used on menus, café walls, posters, you name it. We teamed up with Vidhi Khandelwal, a hand-lettering artist and founder of The Ink Bucket, for lessons.

TEXT BY MEHNA MEHROUN | PHOTOGRAPHS BY RABANI TAYLOR

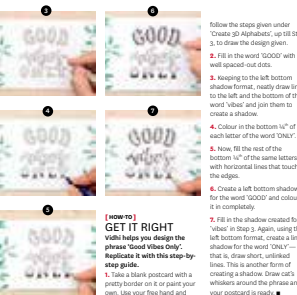

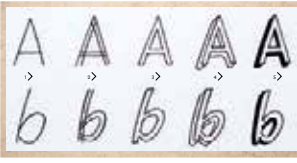

HANDY HELPERS

- Top to bottom: Watercolor & Newton watercolorists
- Faber-Castell paintbrush
- Pencil
- Tombow hard tip brush pen
- Micron marker
- Available at any reputable stationery store.

CREATE 3D LETTERS

1. WRITE THE LETTERS in upper or lower case in your handwriting. 2. DOUBLE ALL THE LINES and the curves. 3. JOIN THE OPEN ENDS and erase the overlapping lines.
4. TO CREATE A SHADOW, pick one of the following: left bottom, right bottom, left top or right top. Vidhi has picked the left bottom shadow style here. To replicate this, create lines to the left and the bottom of the alphabet and join them to create a shadow. 5. COLOUR THE SHADOW and you are done!

Follow the steps given under "How to" in step 3. Again, using the left bottom shadow, create a line shadow for the word "ONLY". This is a line shadow, not a solid shadow. This is another form of creating a shadow. Draw each letter on a separate sheet and your posterboard is ready. ■

HOW TO

GET IT RIGHT

Vidhi helps you design the phrase "Good Vibes Only". Replicate it with this step-by-step guide.

1. Take a blank posterboard with a pretty border on it or paint your own. Use your free hand and

did you know? Your spine isn't straight. It has three natural curves that help make it upto 10 times stronger.

4 EXERCISES FOR A HEALTHY BACK

So that you don't experience pain, strengthen and stretch key muscles using these moves from David Hany, PT, owner of React Physical Therapy in Chicago.

1 KING COBRA

Stretches upper back. Lie face down on the floor with palms flat on the ground under shoulders. Bring right knee to side near hip. Rise up onto your palms, and squeeze shoulder blades together. Feeling the stretch through upper back. For an added challenge, bend left leg up at knee. Hold for five seconds.

2 FOREARM PLANK

Boosts core stability. Start face down on the floor and lift into plank position resting on your forearms with elbows directly below shoulders. Squeeze shoulder blades together. Feel the stretch through upper back. For an added challenge, bend left leg up at knee. Hold for five seconds.

3 STANDING BACKBEND

Improves spinal flexibility. Stand straight, feet hip-distance apart. Press palms into your forehead, gently pulling your sacrum (the lower part of your spine) slightly forward. Squeeze glutes and lift your upper body back. Hold one count, release and repeat six to eight times.

4 SCAPULAR RETRACTION

Strengthens upper back. Hold a resistance band (or a towel) in both hands with arms extended straight overhead, palms facing forward. Lower the band behind you as far as you can in a controlled, slow motion while pulling it from both ends. Return to top and repeat. Do six to eight repetitions. ■

Avoid spinal manipulations for the neck; there's a very small risk of developing a neck injury, so seek a physiotherapist.

home | style made simple

**THE MAGIC SPELL**  
My home measures 500 sq ft, but don't let its size fool you. Thanks to a tiny living room with sleeping space for three, a second bathroom (bathroom where I can read at night), a master bedroom with a bathtub, a bathroom with two restrooms, and a dining area modified into a laundry room—perfect for my husband, our two cats and me.

How do you make it work? "I'm a 500-sq-foot flat! All white, with two cats, in Mumbai, which is practically a giant home!" To be honest, I can understand the incredulity. I still remember that damp day back in June 2007 when I stepped into my tiny, one-room flat in Andheri West, Mumbai. I could have cried as I beheld the dismal scene before me—a table light flickering away across a shabby space, furnished only by a mattress, a rug and a hot plate. I briefly wondered if I'd made the greatest mistake of my life by taking up this apartment. But then, my doubts disappeared, and I began to see the room for what it could be. And that alone made a world of difference. You see, a good-looking home ending comfort and tranquility has little or nothing to do with its carpet area. It is my belief that a small home can be a stunning one too, with enough space to fit the world in it. In the next few months, I brought in a bed with a built-in headboard (for additional light), a sofa cum bed and a reading table (that served as a convenient desk, too) with a chair. In a corner, I placed a yellow light, which instantly opened a warm hue. And just like that, the space was transformed into a cheerful, open room. It was my life of Thelma.

## GOOD THINGS, small packages

**RUKMINI RAY KADAM**, founder of the popular blog Trummetr, says that creativity and planning are all you need to transform a space. She did, with her 500-sq-ft Mumbai flat. You can too.

52 **BRUNNEN** | June 2018

### MY TINY CASTLE

Like all magic tricks, it's what the eyes see. All you need to do is choose your colour scheme, furniture and setting wisely.

#### LIVING ROOM

Though our living room plays the role of a den, dining room, guest room, my husband's gym, my studio, and more, the 200-square-foot room doesn't feel cluttered. Instead, it's cozy. How? The first thing we did was choose a white theme since the colour reflects light and gives an illusion of space. Indeed, we selected furniture with dual functionality—our day bed has storage space and our sofa transforms into a bed. Third, we painted the furniture—apart from a few accent pieces—white, like the walls, reinforcing the feeling of openness. And last, we arranged the room in a way that allowed as much natural light as possible from our two huge French windows. Our dining table is placed against one of them. The view is lovely!

#### BEDROOM

We used the same techniques in our 100-square-foot bedroom—painted the two beds and cupboards in the same shade as our walls, used the window as a headboard for our queen-sized bed, and added soft furnishings to bring in an element of texture to an otherwise plain room.

#### THE HAMMOCK HIDEOUT

We fell in love with this house mainly because of the view it offered and its many balconies. To take full advantage of the view from our bedroom balcony, I added a full-sized hammock, some coastal lights, a table, chairs and a few plants. It is and has been a truly very own little hideout.

**WE PAINTED THE FURNITURE WHITE—APART FROM A FEW ACCENT PIECES—LIKE THE WALLS, REINFORCING THE FEELING OF OPENNESS.**

53 **BRUNNEN** | June 2018

living | better living

### HOME

This is where it all begins. In fact, there are tons of little things we can do in our homes that play a part in reducing landfill waste, cleaning the air and preserving the natural landscape. Here are some of the choices.

#### ENERGY SAVERS!

#### Switch to CFL bulbs.

Changing all your light bulbs to CFL bulbs (the original low-burned-out, of course) helps save three times as much energy and takes less energy for the same amount of brightness. For instance, if you use low light bulbs normally, you can get your hands on a CFL that will last up to 10 years.

#### Use VOC-free paints.

Volatile Organic Compounds (VOCs) are solvents that get released into the air as the paint dries and are harmful to your health as well as the environment. If you want to paint your walls, use the VOC-free, low-VOC or natural paints instead—check the label for details.

#### Upgrade furniture.

Shabby stuff has been around for a while and it doesn't seem to be going anywhere. So, upgrade your antiques—it also keeps them from reaching the landfill. If you must buy furniture, opt for sustainable options, like those made of recycled wood or bamboo, upholstered in organic cotton and stuffed with sustainable fibres.

#### OUR SELECTION!

Cutting-edge infrastructure, backed with advanced machinery and technology, Indian Railways is creating a new era of products, like the HomePod, the new iPhone.

#### DIY STAIN REMOVER

Mix white vinegar, baking soda, oxygen bleach, hydrogen peroxide, lemon juice and natural soap in a bottle. And remember to keep the stained cloth in full sun.

#### Donate what you don't need.

Before you throw out old clothing, furniture, books or stovetops, consider donating them to a local donation centre or NGO. You never know what someone might consider as treasure.

#### Use natural air fresheners.

Light a candle in the middle of a bowl of fresh coffee beans and allow them to get warm. Or make your own perfume sprays by adding oil to a drop of essential oils to water in a spray bottle.

#### Conserve water.

Fix leaky pipes or running toilets. Fill up a 10-litre bottle with water and place it in your flush tank—this will ensure that less water is used when you use the flush.

#### 1.6 lakh litres of water are saved when a family of 4 installs a low-flow shower head.

### KITCHEN & FOOD

Going green in the kitchen is much more than buying organic or farm-fresh foods. It's also changing the way you cook, clean and live. The best part: This is one of the easiest places to start.

#### ASIP FOR THE WORLD!

Remember, use this mug here, is a more eco-friendly option than plastic cups. Some hot tea in this mug, and you're done. at [pigeon.com](http://pigeon.com)

#### Don't throw away leftovers.

Turning leftovers into creative meals saves you from using another day's produce and from keeping what you've cooked from reaching the landfill. And these leftovers are also what you want.

#### Shop locally.

Food goes through many hands of processing—from the farm to the fork. However, you can skip all that by buying locally sourced produce that comes with them. It's also packaged food and instead shop locally to farmers' markets. Buy meat directly from the butcher and stock up on bulk groceries and emergency produce to avoid packaging materials.

#### Cut your food into smaller pieces.

Cooking this takes a lot less time and you'll save on gas and energy in the process.

#### Ditch plastic and paper.

From straws and lids to containers and bottles, switch to glass or stainless steel. These chemicals are likely to get in. Silicone muffin moulds don't require paper or plastic liners and wash great. Turn old clothes into cleaning cloths.

#### Carry reusable bags.

Use reusable bags. You can cut down massively on new plastic bags with each shopping trip.

#### CHOOSE YOUR COOKWARE WISELY.

Don't be afraid to invest in high-priced but good and sustainable cookware that will stand the test of time. Ditch Teflon and opt for stainless steel or cast iron. This will, in the long run, save you money by not inviting replacements often.

#### 1% of plastic bags are recycled worldwide.

#### Organic produce doesn't use any chemical pesticides that can harm our ecosystems. So, buy organic products and food, whenever you can.

THIS SET OF HANDMADE, CARP BOW BARS BY ZORITA IS AN ECO-CONSCIOUS CHOICE. ₹2,400. at [AMAZON.IN](http://AMAZON.IN)

special

#### 16 Choose a wallpaper that adds to the language of the space and its furniture in an integrating manner rather than taking away from it. If it looks forced, it will end up looking like a wrapping paper!

#### 17 Scout for multi-purpose home products for awkward corners. A ladder-shaped wall shelf can be used as a book shelf in a living room or as a short rack cum coat hanger for the entryway. Buy DIY furniture that can be dismantled or moved to new spaces.

#### 18 Use decoration items on an empty wall or cover the space with a bookshelf. Decorative wall clocks and quality posters are also good options for beautifying a negative space.

#### 19 Vacant spaces can be utilised with the help of partitions. A bean bag or even a centre table can also transform such vacant spaces into cosy nooks.

#### 20 Buying online is actually easy. Just do ensure that the product you buy fits the space without really filling it. The size of the product should be appropriate to the size of the area that you want to fill. A large wall clock, which takes up the entire wall, is not a very good idea. Also, avoid buying dark-coloured home decor products online.

#### 21 To give your walls a chic makeover, replace simple beige, cream or white walls with interesting shades like berry, sage green or deep ochre. It depends on the shades of your furniture, so, choose one that is more dramatic.

#### 22 Add vertical stripes in complementing shades, like a light beige with a dark beige, to a headboard. For your dining space, paint a white wall with vertical stripes in black or navy blue.

#### 23 This year is dominated by deep-coloured walls in the library, den and living spaces. Another dramatic look is a concrete concrete style.

#### 24 Though wall paints are cheaper than wallpapers, they will need to be highlighted with artwork, frames or mirrors. A wallpaper, though, adds the necessary design element that a space needs. So, it's more cost effective!

#### 25 Amongst wallpapers, bold prints are in globally. These are followed by big floral patterns in kids' rooms and vintage designs that give a bit of a flared-up look rather than looking plain or well-worn.

#### 26 Utilise the area under staircases by placing shoe racks or smaller cabinets here.

#### 27 Negative space walls can be highlighted using light shades, such as pastels, whites or greys. These will actually help make the space look much brighter.

#### 28 Think bright greens, oranges, or greys, teal, turquoise, navy, mustard, pink, lavender and other neon shades for upholstery.

#### 29 Upholstery fabrics that are in trend include faux fur, velvets and velvets. Arrange patterns, designs inspired by nature and its surroundings like birds, butterflies, flowers and botanical patterns are currently ruling the charts.

#### 30 To buy the right product online, check the dimensions and read the description, so that you know the quality of the item better.

#### 31 Whimsical décor means 'altering or breaking the rules'. So, be confident when playing with such a look as the choices are different and may not gel with your personality.
